### Le Scuole eTwinning si impegnano nell'attuare una leadership condivisa

Nelle Scuole eTwinning, la leadership è un'attività condivisa sia per quanto riguarda l'organizzazione che i processi decisionali. Il dirigente scolastico e gli eTwinners più esperti sono consapevoli del valore delle possibilità offerte da eTwinning a livello sia pedagogico che professionale, e sostengono attivamente tutto il personale affinché partecipi alle attività eTwinning.

### Le Scuole eTwinning mostrano un grande impegno verso la collaborazione, la condivisione e il lavoro in team

Gli insegnanti di queste scuole lavorano in team per pianificare le attività eTwinning e le altre attività didattiche, e condividono esperienze e pratiche con i colleghi, all'interno e all'esterno della scuola. Collaborano per realizzare un piano di azione eTwinning, utilizzandolo per guidare l'innovazione e il cambiamento nella loro scuola e al di fuori di essa.

### Gli studenti delle Scuole eTwinning sono agenti di cambiamento

Gli studenti hanno un ruolo determinante nello sviluppo della Scuola eTwinning: promuovono eTwinning presso gli insegnanti - sia quelli già attivi in piattaforma che coloro che non lo sono ancora - e tra i genitori, agendo al contempo da forza motrice e cassa di risonanza per tutte le innovazioni che si realizzano in campo didattico e nell'uso della tecnologia.

### Le Scuole eTwinning sono modelli per le altre scuole

La Scuola eTwinning si impegna a svolgere un ruolo di ambasciatrice per le altre scuole della zona, promuovendo attivamente eTwinning e diffondendo i risultati ottenuti con ogni mezzo possibile: giornate a porte aperte, riunioni informative e attività di mentoring. Sono attive nel creare opportunità di sviluppo professionale aperte alle altre scuole della zona.

### Le Scuole eTwinning sono istituzioni per un apprendimento inclusivo e innovativo

Le Scuole eTwinning promuovono l'inclusione a ogni livello e cercano attivamente modi per creare un ambiente accogliente per tutti gli studenti, di ogni cultura e a prescindere dalle loro abilità, per i loro genitori e per la comunità nel suo complesso. Gli insegnanti delle Scuole eTwinning si impegnano a rendere la scuola un reale ambiente di apprendimento, e usano eTwinning per potenziare e svolgere il programma scolastico applicando metodi innovativi, tra cui l'apprendimento collaborativo e la didattica incentrata sugli studenti, nonché tempi e spazi di apprendimento flessibili.

La dirigenza scolastica e gli eTwinners più esperti riconoscono l'importanza e i valori di eTwinning che per questo vengono inclusi nelle politiche scolastiche, nella didattica e nello sviluppo professionale.

Nelle Scuole eTwinning, gli insegnanti lavorano insieme per condividere i loro punti di forza e offrire un'esperienza educativa più ampia e ricca per tutti.

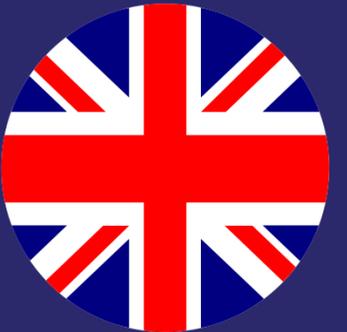

Le Scuole eTwinning sono modelli: ispirano e guidano le altre scuole affinché raggiungano i livelli ai quali loro stesse sono arrivate. Così facendo assicurano che la promessa di un cambiamento nel mondo della scuola sia mantenuta, così che i giovani loro affidati vengano seguiti nel modo più adeguato per poter diventare persone migliori, studenti migliori, cittadini migliori e più attivi.

## ABOUT OUR PROJECT

Raising students' awareness about the importance of eating healthy is the basic aim of our project. Students presented their local healthy food .Our pupils expressed likes and dislikes about foods. They described what people do regularly. They made different activities and present their local healthy foods with presentations (web 2. 0 tool.) They made interaction and collaboration with other schools and learn their local healthy foods on our zoom meetings.

Our students prepared balanced menus, e-recipe book, poem and discovered new dishes from their partners' countries. Our students were aware of eating healthier and staying healthier. Also, they got new eating habits. We asked them to know about the nutritional value of their favourite dishes. Thus, Evelin Gallo invited to Tiziana Papetti for our healthy nutrition seminar. At the end of the project, our students understood the choice of what they eat is important. Moreover, they shared some examples of healthy popular dishes in each country in order to discover about different European cultures and traditions through food and eating habits. Our final product was preparing an advertisement about eating healthy and staying healthy. We completed our project successfully. We got National Quality Labels and European Quality Labels.

**"we live together " I am looking for my friend on the world journey..**

Event Instructions: 1- At the end of this activity, our students will become aware of our core values (friendship and friendship). 2- Members were divided into five groups and a special coordinator was assigned to organize the work in each group. 3- Each group has its own page created on the forum. Additionally, our teachers who wish can create a Whatsapp group for quick communication. (It is a method of communication). Or you can communicate as a Team in any other way.. 4- Each team chooses its own name related to the main value. (You can give a name to your own Group. Recommended activities: 1- Communicate via the forum to complete the tasks. 2- There will be a poster and slogan competition between the groups on the dates we will determine later. Each group will participate in the competition with a poster and a slogan. Members of the team will determine the poster and slogan that will participate in the competition. 3- You can do all kinds of activities in groups. You can create electronic cards for your friends. 4- Conversation meeting (discussion of a book chosen by the team). 5- Researching one of the touristic and historical areas in the countries of the team members and creating tourism promotion advertisements for it (associating the school curriculum (history - geography - antiquity - environment - science - Arabic language - English language)) Final product (video for each team). # EVERYWHERE WITH OUR VALUES

## “EVERYWHERE WITH OUR VALUES”

Türkiye(9), Tunisia(9), Jordan(7), Italy(7), Azerbaijan(4), Poland(4), Romania(3), Georgia(2), Greece(2), Albania(1), France(1)

Age range: 5-16

Short description;

The "Everywhere With Our Values" project was created entirely on a voluntary basis. Our schools are not only places where academic education is provided, but also institutions that contribute to the moral development of students and transfer our values to future generations. It is possible for children to adopt universal values and make them a way of life through values education. In our project, we will organize activities on a different value every month. Values education helps people make the right choices, control their behavior, make moral decisions, learn about their own values and the values of others, express themselves and feel self-confident.

Aims;

- Instilling more basic human values and virtues in our students, creating sensitivity towards values and transforming them into behavior.
- Developing and reinforcing the values accepted by society by creating a suitable school environment.
- Raising students equipped with academic knowledge and moral values that will guide them in real life.
- Dissemination of Good Examples applied in Values Education

Work process;

A joint group study was conducted with the participation of all our members from different schools and countries. Activities were identified during the first phase of the project, with the participation of all relevant partners. The identified activities and project action plan were added to the system.

## “EVERYWHERE WITH OUR VALUES”

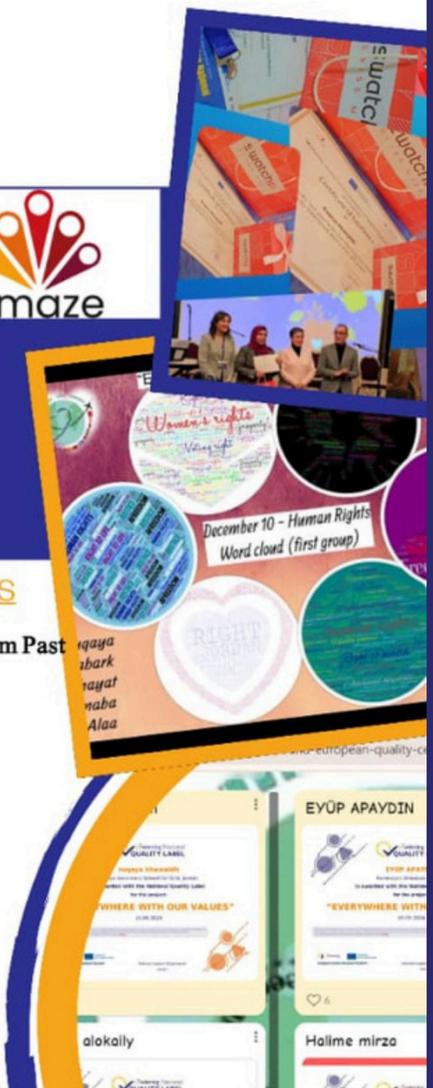

Individual work in a project stands out as an important component of teamwork. Although cooperation and collaboration are important, individual effort also has its own value.
